

Tree Free Paper Products

How do you reinvent paper? The answer is as sweet as it is smart. Each year over 900 million trees are harvested for paper products. Green² is Tree Free paper made from quick growing bamboo, the most rapidly renewable resource.

We didn't reinvent softness, strength, or absorbency ...
our paper products already stack up to those tests.

Bath & Facial Tissues, Towels, Napkins, Recyclable/ Compostable Cups & Straws

© Sugar Girl
